

170.315(B)(10) ELECTRONIC HEALTH INFORMATION EXPORT

MedConnectHealth is compliant with 170.315(b)(10) and meets the following requirements:

- **Single patient electronic health information export.**
 - Enable a user to timely create an export file(s) with all a single patient's electronic health information that can be stored at the time of certification by the product, of which the Health IT Module is a part.
 - A user must be able to execute this capability at any time the user chooses and without subsequent developer assistance to operate.
 - Limit the ability of users who can create such export file(s) in at least one of these two ways:
 - To a specific set of identified users
 - As system administrator function.
 - The export file(s) created must be electronic and in a computable format.
 - The publicly accessible hyperlink of the export's format must be included with the exported file(s).
- **Patient population electronic health information export.**
 - Create an export of all the electronic health information that can be stored at the time of certification by the product, of which the Health IT Module is a part.
 - The export created must be electronic and in a computable format.
 - The publicly accessible hyperlink of the export's format must be included with the exported file(s).

To achieve the complete export of all patients, there are 2 available options. A user can perform a single patient export for each individual patient, however because this can become a very time consuming process due to the number of patients within an organization, MedConnectHealth can perform a complete export of all patients upon request.
- **Documentation.**
 - The export format(s) used to support paragraphs (b)(10)(i) and (ii) of this section must be kept up to date.
